Creativity, innovation and artisan excellence have always been fundamental values for Salvatore Ferragamo S.p.A. (SF), which found a concrete application in the conception and realization of each creation.

The deep bond with the territory, its culture and community has developed in Salvatore Ferragamo S.p.A. a greater awareness of the need to protect the social and environmental context in which its business activities are carried out, going beyond what is required by national and international laws and regulations.

Strengthened by these solid foundations, Salvatore Ferragamo S.p.A. has adopted a corporate strategy that places social responsibility at the center of its decision-making process, pursuing economic growth objectives that take into account its own social, environmental and energy impacts.

For this reason the company has decided to implement an Event Sustainability Management System, in particular for the management of the SUSTAINABLE THINKING event. The exhibition project was conceived by the Salvatore Ferragamo Museum, located at the Palazzo Spini Feroni in Florence, for a period of time ranging from 12 April 2019 to 8 March 2020.

In implementing this exhibition project, Top Management is committed to promoting the involvement and participation of interested parties, in order to develop awareness for their role and their social and environmental responsibilities.

Top Management has decided to implement an Event Sustainability Management System for the purpose of:

- ensure **compliance with all legal requirements** applicable to the event in all areas (such as: social, environmental, health and safety, privacy);
- offer **insights on sustainability** to suggest a mindset development, limiting the field of investigation to fashion and arts, the museum’s area of expertise;
- ensuring that **communications with stakeholders** are carried out according to the principles of collaboration, fairness and transparency, encouraging constant dialogue in order to raise awareness of social and environmental responsibility issues;
- promote the spreading of a **cultural heritage** of sustainability, with particular regard to the sponsorship of initiatives for art, cinema and music;
- promote an informed and careful choice of the **supply chain**, preferring suppliers who propose sustainable solutions;
- guarantee the **accessibility** and inclusiveness of the event by ensuring that each of its services is open to all, condemning all forms of discrimination;
- contribute to **safeguarding the environment** and ecosystems by developing strategies and initiatives to minimize the environmental impacts of the exhibition;
- monitor the efficiency in the use of energy resources in order to contribute to the reduction of environmental impacts.

Top Management is also committed to implementing a process of continuous improvement of the Event Sustainability Management System and to spread this policy document so that it is available to all interested parties.
